### PRESELECTOR MODEL NUMBER NOMENCLATURE

#### **FOLDED CAVITIES:**

Special coaxial cavities which are about 3/4 as long as a standard 1/4-wave cavity. Folded cavities are required where cavities are mounted on a 19" wide panel. Add 10% to standard pricing for folded cavities. Consult factory for special configurations.

#### **PRESELECTORS**

### **RECEIVER PRESELECTORS 70-430 MHz**

Cavity Receiver Preselectors up to 300 MHz are generally strapped together with 19" mounting rails. Above 300 MHz, cavities are generally mounted on a 19" panel. All square cavities are panel mounted.
